AUTONOMOUS UNDERWRITING · MALAYSIA

Credibell

Offline-First Loan Underwriting & Multi-Bank Eligibility Engine

From 3–5 business days of manual underwriting to a 30*-second deterministic audit

Made with GAMMA

THE PROBLEM

Malaysian Consumer Banking Friction

Anxious consumers

Typically have to wait days, weeks, or even months just to get a update on the loan application status.

Confusing multi-bank loan quotes

Borrowers struggle to compare rates: Public Bank's 5.3% reducing nominal vs. Maybank's 5.8% reducing effective.

Opaque rejections and slow turnaround

High drop-off from multi-day waits and zero explanation of rejection causes.

Made with GAMMA

THE SOLUTION

The Credibell Pipeline

A four-stage deterministic workflow built for instant, verified lending decisions.

01

Parallel Offline OCR

10 document slots processed concurrently in under 12 seconds via local ONNX PP-OCRv6 binaries.

02

Cross-Doc Compatibility

Net payslip income reconciled against bank statement deposits and EPF contributions to RM 1.00 precision.

03

Deterministic Risk & SHAP

BNM DSR/NDI compliance math paired with on-device ML scoring and transparent feature attribution.

04

Apples-to-Apples Match

Normalizes bank rate math across Malaysian lenders to recommend the lowest total-outlay facility.

Made with GAMMA

Technical Architecture and PDPA Security

10 document slots

ThreadPool ONNX OCR

Cross-document audit

Scoring and SHAP

Bank match

100% privacy and PDPA compliance

Zero PII sent to external cloud LLM APIs; all OCR runs on-device.
